

We make
mechanical components
and complete
devices.

Experience
and adequate machinery
allows us to make:

- shearing on hydraulic shears
- punching on CNC punching presses
- bending on CNC bending presses
- forming details on hydraulic circular presses
- installing of self-clinching fasteners
- grinding and deburring
- machining on CNC milling machines
- machining on CNC automatic lathes
- die-sinking EDM and wire-cutting EDM
- screen-printing
- tampo-printing
- point-welding and welding

ELZAB S.A.

PL 41-813 Zabrze, ul. Kruczkowskiego 39

cooperation@elzab.pl

Produced details
can be protected by:

- zinc plating
- anodizing
- nickel plating
- powder coating

We have 40 years experience
in production, launching
and testing electronic
equipment

We make
mechanical components
and complete
devices.

Experience and adequate
technical backup allows us
to make:

- designing of PCB
- automatic and hand-made THT
and SMD assembling
- automatic and hand-made soldering
of PCB in RoHS technology
- testing of components and final devices
- automatic assembling of wires and cables
(cutting, stripping, crimping, soldering)
- encapsulating of electronic components
(automatic dispensing of resin)
- final assembling of devices on production lines
and slots

We offer the possibility
to store and distribute final devices.

We have our own Electromagnetic Compatibility
Laboratory EMC and Environmental Chamber
(for testing devices and components in different
humidity and temperature conditions).
